

Crop Performance Report: Tomato

This report provides insights on the performance of Tomato over the past year. It includes market trends, growth analysis, and comparison with previous years.

Tomato Growth Performance Graph:

Market trends indicate that Tomato demand has shown stable growth in the past months, with prices rising by approximately 5% due to increased demand and supply chain challenges. Compared to previous crops, Tomato has shown better resistance to disease and climate variations.

Comparison with Previous Crops:

In comparison to last season, Tomato has shown an overall growth improvement of 14%. Yields per hectare have increased, while water and fertilizer usage has reduced by 6%. This highlights better efficiency in crop management.
