

# Crop Performance Report: Potato

This report provides insights on the performance of Potato over the past year. It includes market trends, growth analysis, and comparison with previous years.

## Potato Growth Performance Graph:

Market trends indicate that Potato demand has shown stable growth in the past months, with prices rising by approximately 5% due to increased demand and supply chain challenges. Compared to previous crops, Potato has shown better resistance to disease and climate variations.

## Comparison with Previous Crops:

In comparison to last season, Potato has shown an overall growth improvement of 10%. Yields per hectare have increased, while water and fertilizer usage has reduced by 6%. This highlights better efficiency in crop management.
